NOTE: Album chart information reflects actual airplay on Bluegrass Junction during the prior month. Songs are chosen for airplay based on their popularity with listeners, their relevance to contemporary bluegrass, overall performance quality, and their "fit" with the sound of Bluegrass Junction. The total number of spins for songs from an album determine an album's position on the Album chart. Artists' CDs which have more songs that fit the criteria noted above get more airplay and, therefore, merit a higher position on the Album chart. Inclusion in special programming (*i.e.*, World Premieres, "Track-By-Track", etc.) will also influence airplay totals, and thus, Album chart position.
